Grants from the Citrus Co. Chapter of the Florida Native Plant Society

The Mission of the Florida Native Plant Society is to promote the preservation, conservation, and restoration of native plants and the native plant communities of Florida. Citrus Chapter furthers this mission by supporting partners through grants up to \$300 to assist with the planting of public native gardens, native plant restorations and native habitat creation.

Individuals and groups located in or adjacent to the chapter area of Citrus County are eligible.

We also offer scholarships towards Florida Master Naturalist education.

Additional information can be found at our meetings, our website: citrus.fnpschapters.org, or by emailing: citrusnps@gmail.com
